Meeting Time: from 09:00h to: 10:00h

Type of conference: Telco

Agenda

1. QA Plan elaboration
-

Discussion

We @Project office and some WP4 members had a Meeting on QA Plan development Today morning.

All members agreed that QA Plan needs further development and can not go under a formal review process right now.

We agreed that we have to add some more content on one side and at the same time we have to get rid of some other parts.

Two ideas went in general under investigation :

1. The QA Plan has to be the bible of openETCS project
2. Whoever is a newcomer to the project, has to be able to go through the QA Plan and has to get an idea what is the right behaviour in openETCS project.

We still have to figure out which additional Documents are needed to achieve our ideas 1 and 2. We also agreed that every document has to have a fix owner.

We came to the conclusion that a team is needed to take care of certain parts of the QA Plan and related documents. We further agreed that the team will work with SCRUM strategy.

Since we are in an Open Source enviroment, we need a bunch of volunteers who would like to contribute to the QA Plan development. Following partners have already announced their participation:

Jan Welte

Merlin Pokam

Cyril Cornu

Bernd Hekele

Rico Kaseroni as the owner of the Document

Further I have to discuss with Uwe Steinke and Fausto Cochetti on their possible contribution. Whoever else who is interested to contribute to the QA Plan development, is more than welcome to discuss her/his contribution with the team above.

Notes
